3421 Hancock St, Second Floor, San Diego, CA 92110 | License: C8-0000098-LIC  
 ISO/IEC 17025:2017 Certification L17-427-1 | Accreditation #85368

Sample **STNR - Blazin' Blend Super Lemon Haze Disposable 2mL**

Sample ID	SD230315-002 (69033)	Matrix	Concentrate (Inhalable Cannabis Good)
Tested for	STNR CREATIONS		
Sampled	-	Received	Mar 14, 2023
		Reported	Mar 15, 2023
Analyses executed	CANX	Unit Volume (mL)	2.0
		Density (g/mL)	1.0

**Laboratory note:** The estimated concentration of the unknown peak in the sample is 6.63% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)-8-THC or d9-THC. At this time there are no reference standards available for (+)-8-THC. (+)-8-THC is a different compound from the main (-)-8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)-8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)-8-THC and d9-THC with the majority, if not all, of the concentration being (+)-8-THC. Total (+)-8-THC Concentration is estimated to be: 81.26%

PharmLabs San Diego | 3421 Hancock St, Second Floor, San Diego, CA 92110 | 619.356.0898 | ISO/IEC 17025:2017 Certification L17-427-1

\*This report shall not be reproduced except in full, without the written approval of the lab. This report is for informational purposes only and should not be used to diagnose, treat or prevent any disease. Results are only for samples and batches indicated. Results are reported on an "as received" basis, unless indicated otherwise. When a Pass/Fail status is reported, that status is intended to be in accordance with federal, state and local laws which are required for the customer to be in compliance. The measurement of uncertainty is not included in the Pass/Fail evaluation unless explicitly required by federal, state or local laws and has been reported on the certificate of analysis. Measurement of uncertainty is available upon request.

Sample **STNR - Blazin' Blend Tropicana Cookies Disposable 2mL**

Sample ID <b>SD230314-134 (69042)</b>	Matrix <b>Concentrate (Inhalable Cannabis Good)</b>
Tested for <b>STNR CREATIONS</b>	
Sampled <b>-</b>	Received <b>Mar 14, 2023</b>
Analyses executed <b>CANX</b>	Reported <b>Mar 16, 2023</b>
	Unit Volume (mL) <b>2.0</b>
	Density (g/mL) <b>1.0</b>

Laboratory note: The estimated concentration of the unknown peak in the sample is 7.46% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)-8-THC or (-)-8-THC. At this time there are no reference standards available for (+)-8-THC. (+)-8-THC is a different compound from the main (-)-8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)-8-THC and (-)-8-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)-8-THC and (-)-8-THC with the majority, if not all, of the concentration being (+)-8-THC. Total (+/-) 8-THC Concentration is estimated to be: 92.13%
